

Fresh Produce

Abbreviation: Fresh Prod.

Print: ISSN 1749-4788

Frequency and Peer status: Biannual, Peer reviewed

Scope and target readership: *Fresh Produce* only publishes original papers and review articles on research in the areas of postharvest storage, treatment, quality evaluation, packaging, handling and distribution of agronomic (including forage) and horticultural crops. Research results spanning from harvest to consumer will be considered.

Postharvest treatments of fresh product (but not food processing) as affecting the quality of processed product will be included. Interdisciplinary research is encouraged.

Market analyses, consumer trends, novel quarantine measures and legislature pertaining to the handling, marketing or distribution of fresh produce also fall into the scope of this journal.
